Head of Tripadvisor's Core Product Analytics function with 14+ years in analytics, data science and financial services. Combines international team leadership and experience managing individual contributors and team leads with hands-on SQL, Python, experimentation and applied AI.

CORE SKILLS

Leadership: Manager development, hiring decisions, coaching, capacity planning, executive stakeholder management
Analytics: A/B testing, causal inference, product metrics, funnel and retention analysis, marketing measurement
Technology: SQL, Python, Snowflake, Tableau, Google Analytics, OpenAI APIs, Claude Code, Codex, Cursor

PROFESSIONAL EXPERIENCE

Tripadvisor | Product Data Analysis Manager
Lisbon, Portugal | Mar 2024 - Present

- Lead Core Product Analytics across Hotels, user-generated content, mobile apps and AI-powered travel planning, including cross-product conversational analytics. Established executive metrics forums with Product, Data and Engineering leaders to guide roadmap priorities.
- Managed individual contributors and team leads and scaled an international team from 3 to 10 analysts across 3 countries, achieving 90% retention through structured coaching. Owned hiring decisions, performance management and capacity planning.
- Deliver SQL and Python analysis, metric design, dashboards and experimentation across all team product areas; analyse funnels, cohorts, retention and performance to guide decisions.
- Built an AI analytics toolkit with 10+ reusable skills for Claude and Codex, reducing analytical work from weeks to hours. Workflows cover self-service dashboards, Snowflake SQL, experiment readouts and metric diagnostics.
- Led demos, onboarding and analyst-led validation to help Product and Engineering teams adopt AI analytics workflows for experiment decisions.
- Established an experimentation programme delivering 5+ A/B tests monthly, with a win rate above 25%; winning tests delivered conversion and engagement lifts of 1-5%.
- Built automated metric monitoring and data validation, cutting weekly investigation time by 75%, from 16 to 4 hours.

Tripadvisor | Lead Data Analyst
Lisbon, Portugal | Jul 2022 - Feb 2024

- Introduced analytics sprint intake across 4+ product units, reducing analyst context-switching by 60% and increasing product velocity by 25%.
- Delivered funnel, cohort and retention analyses across six product areas, shaping roadmap priorities; designed and evaluated A/B tests and incrementality studies to guide feature launches.
- Standardised test-design templates and metric definitions, reducing experimentation cycle time by 20%; built automated retention and engagement dashboards that saved 10+ analyst hours weekly and cut manual reporting by 40%.

PROFESSIONAL EXPERIENCE CONTINUED

OLX Group | Regional Data Analyst Specialist
Lisbon, Portugal | Oct 2019 - Jul 2022

- Led analytics for Bulgaria, Portugal and Romania, partnering with Growth, Marketing, Strategy and Monetisation leaders to align product and go-to-market priorities across markets.
- Informed pricing and portfolio decisions across 10+ product categories using ROI modelling, segmentation, cohort and lifecycle analysis.
- Built attribution models and incrementality frameworks for online and offline marketing, supporting budget allocation and campaign optimisation.
- Defined requirements and aligned stakeholders across three markets for a CRM transformation that became the foundation for company-wide marketing automation and A/B testing.

Uber | Marketing Insights Manager
São Paulo, Brazil | Dec 2018 - Aug 2019

- Analysed user behaviour across approximately 10 campaigns; designed A/B tests and causal-impact studies to measure online and offline marketing effectiveness and inform investment decisions.
- Presented market and campaign insights to Latin American leadership, partnering with the research team to shape marketing strategy.
- Co-led a Brazil analytics community of 10+ members and led LGBTQIA+ inclusion and diversity initiatives.

Itaú Unibanco | Senior Data Scientist / Data Scientist
São Paulo, Brazil | Apr 2014 - Dec 2018

- Delivered $10M+ in annual profit impact through credit-risk models using 100M+ rows and 10K+ features, applying logistic regression, gradient boosting, random forests and deep learning.
- Established Python and Spark pipelines to replace legacy SAS workflows, accelerating model development and enabling more sophisticated modelling.
- Developed models for collections and economic capital (PD, EAD and LGD); applied graph-network analysis to identify fraud patterns missed by traditional rules.

Banco Votorantim | Risk Audit Analyst
São Paulo, Brazil | Jun 2013 - Apr 2014

- Audited capital-risk models supporting Basel II implementation and Internal Capital Adequacy Assessment Process (ICAAP) adoption.

EY | Business Analyst (Advisory)
São Paulo, Brazil | Oct 2011 - Jun 2013

- Independently valued derivatives portfolios and fixed-income instruments for financial institutions, using sensitivity analysis and reusable calculation templates.
